

CENTER FOR AI-IOT INNOVATION

Funded by Ministry of Electronics & Information Technology, Govt. of India

The Center for AI IoT Innovation is a facility focused on the integration of electronics hardware design with artificial intelligence (AI). The lab is equipped with hardware development tools, computing systems, and educational resources to support research and development in this area. The center provides resources for both theoretical research and practical applications, aiming to advance the integration of AI technologies with IoT systems.

Ongoing Project:

“Development of digital networking for preventive and predictive environmental and climatic warning solutions - Building an Entrepreneurial ecosystem for addressing Environmental Issues”

Objectives:

- To develop an intelligent sensor module for monitoring and managing environmental pollution.
- To develop and validate a smart water level monitoring solution with an associated alert for floods.
- To create a digital system that effectively monitors and distributes water levels in the local area.
- Development of Explainable AI based analysis software for Internet of Things (IoT) solutions.
- To create start up ecosystem and skill development around these IoT solutions.

Principal investigator: Dr. Ajay Kumar, Associate Professor, ECE Dept.

Co-investigators : Mr. Albins Paul, Assistant Professor, ECE Dept,
: Mr. P.V. Raja Raman, Assistant Professor, CSE-AI Dept,
: Mr. Manesh T, Associate Professor, CSE Dept.
