

EMPOWERING INNOVATION

STUDENT GUIDANCE & ADVANCED LEARNING

SPECIALIZED COURSE OFFERINGS

PRECISION PCB DESIGN & FABRICATION

- Master PCB design from schematic capture to fabrication-ready files.

IOT SOLUTIONS ARCHITECT

- Learn to design, develop, and deploy robust IoT systems, connecting sensors, devices, and cloud platforms.

MASTERING EMBEDDED SYSTEMS

- Dive deep into microcontroller programming, RTOS, and efficient embedded software development.

DIGITAL LOGIC & FPGA DESIGN

- Explore digital design fundamentals and gain hands-on FPGA experience for high-performance hardware.

FULL-STACK IOT DEVELOPMENT

- A comprehensive program covering embedded hardware, connectivity, cloud integration, and data visualization for end-to-end IoT.
